GOthic REVIVAL ARCHITECTURE OF THE 18TH & 19TH CENTURIES

A Presentation which will consider this hugely influential form of architectural design.

What were its origins, and what motivated the Architects involved in the creation of this significant architectural movement which took root in the later part of the 18th Century and finally blossomed into a powerful expression of British 'nationhood' in the 1870's

We will consider buildings of national importance as well as significant local examples of this Architectural form
